Specialty Grooming

*Create A Special
Spa Day
for your Kitty!*

**ACAT
CLINIC**

Requirements

Our primary goal is to keep your cat healthy and comfortable while they are here with us. In order to provide the safest care possible, there are a few requirements before your cat can have their spa day...

- An exam with our doctor within the past year.
- A Feline Leukemia Virus (FeLV/FIV) test.
- Rabies and FVRCP (distemper) vaccinations for their protection, as well as ours.

Proper grooming is necessary for cats of every size!

We understand that grooming can be a stressful experience for you and your cat. We offer calm, careful care with each and every grooming and keep your cat's comfort as a top priority at all times.

We strongly recommend your cat receiving Gabapentin 2 hours prior to their spa day.

Benefits include:

- mild anti-anxiety effects
- analgesic (pain-relief) benefits
- often avoids additional added cost

What Are My Options?

Brush Out - For cats that only have a few non-painful mats that are not close to their skin, or just need a good brushing. *Drop-off appointment.*

Demat - Some mats can be combed out; with severe mats, it's best to use a mild sedative which will keep your cat safe, calm, and comfortable. Any mats close to the skin will require shaving. *Drop-off appointment.*

Perineal Shave - Usually for long-haired cats that need a little help staying clean "back there". *Drop-off, or midday appointment.*

Perineal Plus Shave - Helps your cat stay clean "back there", plus we shave up the underside of their belly to the armpits to get those hard to reach mats. *Drop-off appointment.*

Lion Clip - Body clip that leaves the mane, lower legs, and end of the tail untouched. It's best to use a mild sedative which will keep your cat safe, calm, and comfortable. *Drop-off appointment.*

Bath - Only needed if your cat has poor coat condition (greasy or very scaly), or they have been sprayed by a skunk! *Drop-off appointment.*

"Paw"dicure - Our signature nail trim! Nail trims keep your cat comfortable, and your belongings safe. Included at no-cost with sedation. *Drop-off, or midday appointment.*

Labwork - Bloodwork is required when your cat needs full (injectable) sedation. Over 5yrs old, we can do this the day of grooming. If your cat is 10yrs and older, an appointment in advance is required.

Microchipping - A permanent form of ID done as an injected chip (that is only the size of a grain of rice). If not already done, we recommend microchipping while your cat is being groomed so that they have the added benefit of an analgesic while being chipped.

What Does It Cost?

Day Boarding	\$14.10
Brush Out	\$20.00
Demat	\$25.00 - \$65.00
Perineal Shave	\$28.70
